Family Transition Project
Katherine Hamann, Project Director

Home and family is at the heart of the Family Transition Project. FTP families have experienced the successful transitions of their loved ones from state operated developmental centers to homes in their communities of choice. We share these successes with families who are contemplating or just beginning the process. We provide compassionate support to families, helpful information, and a lifelong experience in coping with the challenges our loved ones face and the barriers we and they may encounter. But most of all we offer hope that a successful transition is possible and is well worth it.

Ligas Family Advocate Program
Shirley Perez, Director

The purpose of the Ligas Family Advocate Program is to provide family-to-family advocacy support for Ligas Class Members, individuals and their families who are selected through the Illinois Department of Human Services, Division of Developmental Disabilities (DDD) Prioritization of Urgency of Needs (PUNS) as a result of the Ligas Consent Decree. It is a place to get accurate information about options; as well as exposure to experts in the areas of employment, housing and so much more. We create opportunities for Ligas class members and their families to connect with other families. We are a state-wide organization that allows stakeholders to share their unique perspective in the system.

The Arc of Illinois also provides ongoing trainings and conferences throughout the state for self-advocates, family members, and professionals. The Arc of Illinois, through a generous donation, has developed a new **Assistive Technology Program**. This program will fund, or partially fund, the purchase of assistive technology for individuals with intellectual and/or developmental disabilities who have received an evaluation/assessment from a qualified provider but the purchase is not subsidized by Medicaid, Medicare or Private Insurance. Our goal through the Assistive Technology Program, is to enhance and improve the quality of life for persons with intellectual/developmental disabilities by providing opportunities for individuals to receive technology to help with communication, education, employment, community living and independence.
